#### UNITED STATES.

INTERCONTINENTAL RAILROAD. Washington, June 25. - Advices received from the engineers of the in-Intercontinental Railroad Company, state that two surveying parties are now well advanced in the work of surveying the country in the vicinity of | Quito, Ecuador, for the proposed road between North and South America.

A rather large proportion of the future railroad line in Ecuador, has already been levelled and marked by 26, one going south and the other one north. Members of the survey have the way of promoting their work by the government officials of Ecuador who are enthusiastic with regard to the railroad.

One Englishman, a surveyor, died two days after leaving Guayaquil. GOLD PURCHASES.

New York, June 25. -The agent of a European firm purchased \$2,500,000 | in gold to-day for shipment to Europe on Saturday,

THREATENED INDIAN TROUBLES. Washington, June 25.—Indian Commissionner Morgan received a telegram from Collins, Indian agent at Moqui, Arizona, which states that Indians threaten to kill the whites and to destroy their schools. Commissioner Morgan forwarded the telegram to the war department with a recommendation that additional reinforcement be sent to arrest the troublesome Indians and prevent a general rising.

### RUSSIA.

JEWISH TROUBLES. London, June 26.—The anti-Jewish movement is stronger. At Makoviaka the peasants attacked the Jews and killed several of them. The authorities were obliged to quell the disorders. In some other villages, savage ernment is alarmed over the terrible results of its anti-Semitic policy and is said have asked the Council of the Empire to take severe measures to protect the Jews against the rage of the population.

The Russian Government can not permit a part of its population to be subject to cowardly attacks by another part on account of interest or religious

#### Uncle Sam's Big Guns.

Having completed the army 12-inch planing or saw mill. steel rifle and delivered it at Sandy Hook for testing, the Secretary of VIENNA, June 25.—The Emperor | War will proceed at once to make | preparations for the manufacture of a dron, at Fiume said that he hoped in 16-inch gun for coast defense. This zuela San Fernando 307. will deserve to be styled a monster. It will have a length of about 49 1-2 feet and a weight of 125 tons. It will powder, with a projectile weighing reopened with sufficient over a ton, and having a muzzle penetration in iron of about fifteen miles. This is the largest gun contemplated for our forts, since no more powerful one is carried on war ships. But the 12-inch guns will form the great maiority in our seacoast defense. Indeed | courteously and squarely treated. only forty-four of the 16-inch guns are included in the plans of the Fortification Board, and thirty-six of these are for New York, San Francisco and Boston. They are to be mounted in pairs in turrets commanding the principal water approaches, and the pegs. Two parties left Quito on May expense of these turrets will prevent many of them being constructed. But of the 12-inch guns hundreds will be been afforded every posible facility in required, and, indeed, a much greater number of them than all other ca- A young man speaking English and libers put together.

of the effectiveness of the 12-inch gun | generally useful. Address "T. M," is shown by the fact that two of that this office. caliber are to be mounted on the Monterey, in place of the 16-inch at first contemplated, while the 13-inch is the largest to be carried on the new French and German, well accustomed | battleships, Massachussetss, Indiana | to the raising of horses and all kinds | and Oregon. The 12-inch gun will of cattle, desires a situation. Referbe supplemented for coast defense by ences in England to the Duke of Bed-12-inch mortars, of which several ford, first class recommendations from 340 Prizes of hundred will be supplied.

### Electric Cars Run By Waterfalls.

The advance in all electrical matters is really marvelous. Last week we noticed the fact of a village in the Alps being lighted by electricity, the power being derived from a water-| wheel. A recent number of the Engineer also tells us that in the town of Dover, on the Salomon Falls River, on the division line of Maine and New Hampshire, the waterpower furnishes not only light and heat to that town, but to several distant towns also. Power is also furnished to a street railway seven miles in length. The water-wheel has a capacity of 500
