BY TELEGRAPH.

Concluded from first page.

discussing the Baltimore episode Mr. Blaine, it is reported, saw in the case no reason, so far, for compromising the relations existing between the two countries, while he would not form any definite opinion until the termination of the investigation of the Valparaiso affair. Sr. Montt reports that Mr. Blaine's reception was of the most cordial kind. For our part"—concludes La Libertad Electoal—"we feel sure that, when this is known, the alarming rumors of last night will have an end."

Two officers of the German Navy were insulted on the train. Admiral Valois complained to the Intendente, who promised to use all his power to prevent a repetition.

DECORATING THE GRAVES.

VALPARAISO, Nov. 2.—Yesterday, All Saint's Day, immense throngs of people visited the cemeteries and decorated the graves; those of Cummings and others, who were shot by the Dictator's orders were literally hidden beneath flowers and wreaths.

Similar scenes occuired in Santiago. Women, specially, are profuse in their manifestations, heaping on the resting places of those who fought for liberty's cause huge piles of flowers.

Consul McCreery decorated the graves of the two Baltimore's men.

To-day, All Souls' Day, the same scenes continue.

RUSSIA.

EXPORTATION OF GRAIN FORBIDDEN.

PARIS, Nov. 2.—A telegram received at the Russian Embassy here announces the issue of a "Ukase" in Russia, prohibiting from to-day the exportation of all cereals excepting wheat. Vessels still loading will be allowed to complete their cargos, providing they will sail within 3 days. The Russian government has assigned another 32 million roubles to the "distress fund."

GERMANY.

VARIOUS BILLS.

BERLIN, Nov. 2.—When the Reichstag resumes its sittings, on Nov. 17th, a Social Purity Bill, and the Austrian and Italian commercial treaties will be submitted to it. Also new military credits will be asked. These will constitute the principal business to be considered. The military credits, which will amount to 180,000 marks, will be asked on the ground that there is urgent necessity to reform the artillery service. It is now decided to have new cannon made of steel.

There will be presented a report advising the increasing of the navy, augmenting the number of ships in German waters, and in the South American and Chinese stations. The report of a treaty being negotiated with the United States, involving the reciprocity treatment for American pork and grain with German sugar and other German products, excites the anger of the Agrarian party. Their opposition to commercial treaties will be redoubled in the Reichstag, if the treaties with Austria and the United States are presented simultaneously.

Advices from Russia state that 350,000 colonists, in the famine stricken districts of the Volga, are perishing unaided by the German committee, formed at Riga, awaiting the dilatory assent from the St. Petersburg authorities, to send relief to those colonists.

SALVADOR.

SAN SALVADOR, Nov. 2.—The Venezuelan Minister was officially received, Saturday last, by President Ezeta, with all diplomatic honors. A military review of the troops of the city garrison was held in honor of the minister.

The commercial fair at Chalatenango is now taking place. Numbers of foreign and native merchants have gone there from all parts of the country to sell their goods and to buy indigo. The transactions in the article alone, amount to 350,000 lbs.

An invitation has been distributed for a grand ball which President Ezeta and his wife give on the 4th instant on account of the President's birthday.

GREAT BRITAIN.

IT WORKS WELL.

LONDON, Nov. 2.—Carnegie, the Pittsburg Iron King, says that the McKinley Tariff works well. He thinks the United States gets the cream of European immigration.

PARTIALLY DESTROYED.

LONDON, Nov. 2.—Marlborough House, the residence of the Prince of Wales, was partly destroyed by fire, while the Prince and his family were absent.

TURKEY.

CANNOT DISEMBARK.

CONSTANTINOPLE, Nov. 2.—The Porte is enforcing a recent decree prohibiting Jewish families from entering Turkey. Two steamers, having on board 160 Russian Jewish refugees, have been refused permission to disembark their passengers.

FORTIFICATIONS FOR THE DARDANELLES.

VIENNA, Nov. 2.—It is said that the Sultan was thoroughly aroused in his recent conference with the British Embassador, Sir William White, as to the growing danger of an attack upon Constantinople by a Russian fleet from the Black Sea, possibly aided by the French from the Mediterranean, and he then and there declared his purpose to put himself in a position for a defense that would last sufficiently long to enable friendly powers to come to the rescue.

The Sultan is known to be deeply attached to Constantinople as the seat of the Ottoman Empire, and to have no intention of abandoning it.

It is not intended to intrust the work of building defenses to Turkish officers. Some of the best engineering talent in the German army will be engaged for the purpose. With the consent of the Kaiser William, Maj Steffen, of the German army, has been given a leave of absence, prolonged for three months, to instruct the Turkish artillery in the use of both heavy guns for fortifications and of the field pieces.

The artillery is to be thoroughly reorganized under the Major's supervision, and the work of reorganization will keep pace with the laying of the fortifications. New canon are to be supplied from German and British foundries and both the Bosphorus and Dardanelles will be put in a condition to give a hot reception to any fleet endeavoring to force an entrance.

FRANCE.

ALGERIAN COMPLICATIONS.

PARIS, Nov. 2.—The Algerian Committee of the Colonial Council has decided to immediately occupy the Tonat Oasis by military force, if necessary.

Construction in Mexico.

General Manager Joseph A Robertson, of the Monterey and Mexican Gulf line, is referred to in the San Antonio Express as one of the most remarkably successful railroad men in the republic. He is quoted as follows: "I believe that there will be more miles of railroads built in Mexico during the next twelve months than there are constructed in the United States in the same period of time, There are certainly more projects in sight, in that country at the present time than there are in the United States. There are vast areas of rich agricultural and mineral lands in Mexico yet to be developed by the building of railroads."

In speaking concerning the Tehuantepec Railroad project, which is just now under somewhat of a cloud because of the action of Salvador Malo, who is alleged to have secured a very large sum of money from the Government without making adequate returns, Mr. Robertson said: "The Tehuantepec enterprise is one of the greatest ever undertaken in Mexico It is in charge of the Government and the road is certain to be built. Fifteen million dollars have already been expended on the road and the Government could not well afford to let the work stop after having gone so far along with it."

"I see Jack and Molly have made it up again. Why was the engagement ever broken?"

"They had a quarrel as to which loved the other the most."

Grand Monthly Ordinary Drawing of the

LOTERIA DE LA

BENEFICENCIA PUBLICA

The Mexican International Improvement Company, organized with a capital of $2,000 000, and composed of Mexican and foreign capitalists, having obtained the concession of this Lottery, will operate it on a much larger scale, and therefore presents the following scheme of prizes which for the number and value thereof, excels that of any other that has ever before been offered to the public. The price of our tickets will be found cheaper, considering the value of the prizes, than any other Lottery Company.
